MSN 6045

5 November 1959

INFORMATION FOR THE RECORD:

1. Mission 6045 was received unprocessed from overseas on 3 November 1959. Possible courses of action were discussed with [redacted]. It was decided that the film should be moved to the processing site as soon as possible consistent with the requirements of the USAF (EAC) which was instrumental in obtaining ABC-URB concurrence for conducting the mission. One DP would be ordered for use in the preparation of the OUE and subsequent review by the interested customers to determine their requirements for additional duplication.

2. [redacted] indicated plotting would be accomplished from Tracker DP. This was followed by a check with [redacted] Chairman of the ABC-URB, who concurred in this course of action. Movement should be accomplished by 9 November 1959.

3. [redacted] AFCII was contacted and concurred; processing can proceed on a normal work-day basis.

4. [redacted] was advised of the action taken. The undersigned also indicated that little time would be lost in the processing cycle to prepare an additional duplicate (Dupe Neg) for use in the Photo Lab, thus expediting the preparation of the OUE.

5. [redacted] has been contacted and is tentatively planning on moving the original to the processing site on Friday evening, 6 November 1959, via commercial aircraft. Processing will be conducted on a regular work-day basis.
